

## **PUMP DRAIN PLUG IS IN PLASTIC BAG**

Please install the **Threaded Plug** into the small pump housing prior to filling the spa with water. See plastic bag which is attached to the small pump by the spa equipment. Plug has been removed at the spa factory to drain the test water prior to transportation.

## **FILLING SPA WITH WATER**

- \* Remove filter cartridges and fill the spa through the filter housing.
- \* This will allow the plumbing lines to fill from bottom of the spa.
- \* Filling through the filter housing will remove air from spa lines.
- \* Use hose and sediment filter if one was furnished with the spa.
